

Westchester & Fairfield Counties' Exclusive Springfree Dealer

"The World's Safest Trampoline"

Springfree is the only trampoline manufacturer that has gone back to the drawing board and eliminated from their design the four areas that traditionally cause trampoline injuries

- 100% Spring Free** – Springfree™ Trampoline uses flexible fiberglass rods to give a soft non-jarring bounce. The rods lie beneath the jumping surface out of harms way. Traditional trampolines have springs that give a harsh, jolting bounce, and despite safety pads can still injure.
- SoftEdge™ Mat** – Springfree Trampoline has a SoftEdge, which is over 30 times more shock absorbent than pads. The hard frame and springs on traditional trampolines can only be hidden and slightly softened by pads. Plus, Springfree's frame is hidden well beneath the jumping surface. You can't hit it, period.

- FlexiNet™ System** – The Springfree FlexiNet enclosure directs the jumper back to the center, and cannot make contact with the flexi rods. Traditional enclosures can direct jumpers into rigid steel poles or straight down onto the springs and frame.
- Flexible Enclosure** – Springfree uses flexible supports to cushion jumpers and prevent falls. Traditional enclosures are supported by hard metal poles. Springfree's FlexiRod system ensures that a jumper is cradled safely by the flexible rods.

Springfree Trampoline Proudly Accepts Parent's Choice Foundation Recommendation

The Parent's Choice Foundation has selected Springfree Trampoline as one of the winners of its coveted 2009 children's toy awards. The Foundation is the nation's oldest nonprofit guide to quality children's media and toys.

According to the Foundation's recommendation "Although our

judges are not in the habit of awarding trampolines, the Springfree had so many unique safety features that they couldn't deny. Our testers, ranging in age from six to sixty-six, found skills they hadn't known, confidence that needed reawakening, and a hefty dose of much needed family fun. If your family has been thinking about a trampoline, this is highly recommended and worth serious consideration"

O-92 Large Oval

• 8' x 13' • surface area 92 sq. ft. • height 9.0 ft.

S-113 Large Square

• 11' x 11' • surface area 113 sq. ft. • height 9.3 ft.

S-155 Jumbo Square

• 13' x 13' • surface area 155 sq. ft. • height 9.3 ft.
